

REMOVER STUCCHI SPRAY

Strong cleaner for cement and epoxy fillers

DESTINATION → Acid-resistant vertical and horizontal surfaces such as floor and/or wall coverings in **terracotta, stoneware, porcelain stoneware, clinker, unpolished natural stone**. Do not apply on delicate, polished and/or leaded stone or non-acid-resistant surfaces in general.

PROPERTIES → **REMOVER STUCCHI SPRAY** is a product designed to **effectively tackle the removal of cement grout residues, stains and halos from wall and floor tiles**. **REMOVER STUCCHI SPRAY** is able to attack both the cement and synthetic (epoxy) components of grouts commonly used for grouting tiles during installation. Its cleaning action **does not damage the flooring/covering materials** and guarantees high cleaning effectiveness, restoring surfaces to their original appearance after cleaning.

USE → Before any intervention, the surface to be cleaned **must be perfectly dry**. **REMOVER STUCCHI SPRAY is ready for use**. Then apply the product by **spraying it directly onto the surface** to be cleaned and **leave it to act for 2-5 minutes**. Assist the cleaning action of the product by using an **abrasive pad or sponge** (for cleaning large areas use a scrubbing brush or single-brush). Then **rinse the surface thoroughly with clean water** and remove all cleaning residues with absorbent paper/cloths or a vacuum cleaner. If the removal of grout residues is carried out several hours after application, it may be necessary to allow the product a longer contact time (15/25 minutes), to spray more product or to carry out the removal in several passes.

The success of any subsequent protective treatments is determined by **perfect cleaning, good rinsing and complete drying of the substrate** (at least 1-2 days after washing).

Establish the resistance of the substrate to the product by means of a preliminary test in order to avoid possible undesirable effects.

YIELD → As an indication, **4-8 m²/l** of product.

TECHNICAL DATA

- **APPEARANCE:** straw-coloured liquid with a pungent odour
- **pH:** 1 ± 0,5
- **SPECIFIC WEIGHT:** 1,2 Kg/l ± 0,1

PACKAGING

1CR226L05 → 12 x 500 ml in plastic **SPRAY BOTTLE**

WARNINGS

- Product intended for professional use.
- Carefully protect surfaces for which the product is not intended.
- Equip operators as required by current safety regulations.
- Ventilate closed rooms adequately when using the product.
- Storage temperatures: +5 °C / +35 °C

All information contained in our records correspond to our best knowledge of current techniques and cannot be considered binding or challenging as the real application conditions, verifiable case, may also result in major changes of both practices described above and the results obtained. Perform preliminary tests to determine if the product is suitable for the intended or not. We decline any liability for any damage resulting from improper use or misuse of the product. Do not litter in the environment. This data sheet replaces all previous versions.
